

This dread contagion is spreading over the country at an alarming rate, leaving death and deformity in its wake.

Within a month, nearly 2,000 children have been attacked in New York alone; hundreds have succumbed and over a thousand have been crippled for life.

Scientists have been unable to discover the germ of Infantile Paralysis, but they assert that it originates from unsanitary conditions.

- Started*  
Sub.1. Where the disease ~~strated~~ *started* -- Gowanus Canal, Brooklyn, N.Y.
- Sub.2. Crowded tenements where the disease flourishes.
- Sub.3. Don't let the children play in the street.
- Sub.4. Don't permit them to come in contact with refuse.
- Sub.5. Don't allow the children to purchase fruit or candy which is exposed.
- Sub.6. Don't let the kiddies drink raw milk. Pasteurized milk is the only safe kind.
- Sub.7. Don't permit the children to play with animals, as they are carriers of germs.
- Sub.8. Carrying out a stricken child.
- Sub.9. Taxicabs have been requisitioned to take away victims.
- Sub.10. One hospital has nearly 500 cases.
- Sub.11. A victim of Infantile Paralysis.
- Sub.12. (Newspaper heading) INFANTILE PARALYSIS SPREADS.
- Sub.13. All windows should be screened. Flies spread the disease.
- Sub.14. Health authorities strongly recommend boracic acid as a preventative.
- Sub.15. Dissolve a teaspoonful in hot water.
- Sub.16. Gargling the throat.
- Sub.17. Washing the eyes.
- Sub.18. Spraying the nostrils.

**Sub.19. "AN OUNCE OF PREVENTION IS WORTH MANY POUNDS OF CURE."**
